# KEHITTYVÄ kauppa

## Readership and advertisement surveys

Kehittyvä kauppa regularly commissions readership and advertisement surveys. The results for 2024 show that the magazine is an important communication channel for retailers, which allows them to keep up with the development of the retail sector and the K Group and with topical issues. According to a reader panel for the issue surveyed, the magazine provides useful professional information for K-store employees. Readers also value the theme inserts and say they help in the development of selections.

The advertisement survey is carried out annually. The advertisements placed by partners in the issue surveyed are studied. The results and successes are also discussed with the partners.

## The magazine's advertisement survey examines, among other things:

- The role of the magazine in the advertising of new products and the use of advertising in stores
- The media coverage and effectiveness of advertisements
- The importance of the magazine as a source of information for employees of various K Group grocery chain stores
- The relationship between the magazine and employees of K Group grocery chain stores

The survey was carried out by Rian Oy.

The survey's target group was K-retailers and employees in the K-Citymarket, K-Supermarket and K-Market.
